PROFESSIONAL SUMMARY

Flutter Developer with **3+ years of experience building production-grade, scalable cross-platform applications** for Android and iOS. Specialized in **REST API integration, third-party SDK integration, and maintainable UI development** using Flutter and Dart. Delivered **6+ production applications used by 100+ active users** across e-commerce, logistics, ERP, and fintech domains. Strong foundation in state management (Riverpod, BLoC, Provider), Firebase services, and Google Play Store deployment. Experienced in handling the **complete app lifecycle** from development to production release and post-release maintenance. Currently expanding backend capabilities with **Node.js and Express.js to build full-stack applications**.

TECHNICAL SKILLS

Mobile	Flutter (Android, iOS, Web), Dart
State Mgmt	Riverpod, BLoC, Provider, Cubit
API & Auth	REST API Integration, JWT Authentication, OTP Authentication, Razorpay Payment Gateway
Firebase	Firestore, Authentication, Cloud Functions, Push Notifications
Integrations	Google Maps API, Deep Linking, Supabase
Databases	Firebase Firestore, SQLite, PostgreSQL (basic), MongoDB (basic)
Backend	Node.js, Express.js (<i>learning</i>)
Architecture	Clean Architecture, MVVM, MVC, SOLID Principles
Tools & Testing	Git, Postman, Android Studio, VS Code, Unit Testing, Widget Testing
Deployment	Google Play Store full lifecycle, CI/CD Pipelines, Beta & Production releases
Methodology	Agile Development, Scrum

PROFESSIONAL EXPERIENCE

Flutter Developer *Jun 2025 – Present*
Euphoricoders | Kerala, India

- **Leading Flutter development** for a SaaS-based construction ERP platform used by 100+ users, integrating REST APIs and real-time workflows.
- Implementing **JWT-based authentication**, role-based UI flows for 4+ user roles, and real-time data handling.
- Integrating **Razorpay payment gateway** and third-party services following clean architecture principles.
- Optimized API integration and state management, improving app performance and reducing UI lag in complex screens.
- Improved API response handling and reduced app latency in data-heavy screens by **25%**.
- Collaborating in **Agile/Scrum** sprints — improved workflow efficiency by **35%**.
- **Owned end-to-end feature delivery** from UI development to Google Play Store deployment and post-release monitoring.

Flutter Developer | Mobile App Engineer *Jun 2023 – Jun 2025*
First Logic Meta Lab Pvt Ltd | Kerala, India

- Delivered **6+ production-grade cross-platform applications used by 100+ active users** across e-commerce, logistics, and fintech domains — **supporting 500+ daily transactions**.
- Integrated **Razorpay**, OTP authentication, **Firebase** push notifications, and **Google Maps API**.
- Built multi-role applications supporting **4+ user types** with real-time tracking using Flutter and Firebase.
- Consumed **Node.js REST APIs**, handling error management, pagination, and JWT token lifecycle, **reducing API-related crashes by 40%**.
- Managed full **Google Play Store** release lifecycle including testing, CI/CD pipelines, beta rollout, and production deployment.
- Applied clean architecture patterns (MVVM/BLoC), improving maintainability and reducing defects by **30%**.
- Automated workflows using Firebase Cloud Functions, reducing manual operations by **60%**.

KEY PROJECTS

CivilAcquire — Construction ERP *Flutter | REST API (Node.js backend) | Razorpay | Firebase*

- ERP system for estimation, order management, approvals, and lead automation serving 100+ users.
- Implemented payments, subscription logic, wallet system, OTP authentication, and deployment pipeline.
- **Improved operational efficiency by automating approval workflows.**

TharaCart — E-Commerce Ecosystem	<i>Flutter REST API (Node.js backend) Firebase</i>
Marketplace supporting 4+ user roles with real-time order tracking and logistics integration.	
DCost — Commerce Platform	<i>Flutter Firebase</i>
Multi-role commerce system with product and order management features.	
VivlinoShop — Credit Ledger App	<i>Flutter Firebase</i>
Ledger system with reminders, repayment workflows, and push notifications.	
Construction Admin & DMS System	<i>Flutter REST API (Node.js backend)</i>
ERP with EMI tracking, geo-tagged uploads, and real-time dashboards.	

KEY ACHIEVEMENTS

- Delivered **6+ production applications** used by **100+ active users** supporting **500+ daily transactions**.
- Reduced manual processes by **60%** using Firebase automation.
- Built enterprise-grade multi-role systems supporting **4+ user roles**.
- Managed complete **Google Play Store deployment lifecycle** for multiple applications.
- Successfully published and maintained applications on Google Play Store.
- Accumulated **3+ years of real-world Flutter experience**.

EDUCATION

Bachelor of Computer Application	2020 – 2023
Calicut University, Kerala	
Higher Secondary — Computer Science	2018 – 2020
GVHSS Cherpulassery, Kerala
