PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience building production-grade, scalable cross-platform applications for Android and iOS. Specialized in REST API integration, third-party SDK integration, and maintainable UI development using Flutter and Dart. Shipped 9+ production applications spanning ERP, e-commerce, logistics, and fintech — including multi-role ecosystems connecting customer, admin, merchant, warehouse, driver, and sales-manager apps. Strong foundation in state management (Riverpod, BLoC, Provider), Firebase services, and Google Play Store deployment. Experienced in handling the complete app lifecycle from development to production release and post-release maintenance. Currently expanding backend capabilities with Node.js and Express.js to build full-stack applications.

TECHNICAL SKILLS

Mobile Development:	Flutter (Android, iOS, Web), Dart
State Management:	Riverpod, BLoC, Provider, Cubit
Architecture:	Clean Architecture, MVVM, MVC, SOLID Principles
API & Auth:	REST API Integration, JWT Authentication, OTP Authentication, Razorpay Payment Gateway
Firebase:	Firestore, Authentication, Cloud Functions, Push Notifications
Backend:	Node.js, Express.js (learning)
Databases:	Firebase Firestore, SQLite, PostgreSQL (basic), MongoDB (basic)
Integrations:	Google Maps API, Deep Linking, Supabase
Tools & Testing:	Git, Postman, Android Studio, VS Code, Unit Testing, Widget Testing
Deployment:	Google Play Store full lifecycle, CI/CD Pipelines, Beta & Production releases
Methodology:	Agile Development, Scrum

PROFESSIONAL EXPERIENCE

Flutter Developer

Jun 2025 – Present

Euphoricoders | Kerala, India

- Leading Flutter development for a SaaS-based construction ERP platform (CivilAcquire) used by 100+ users, integrating REST APIs and real-time workflows.
- Implementing JWT-based authentication, role-based UI flows for 4+ user roles, and real-time data handling.
- Integrating Razorpay payment gateway and 3+ third-party services following clean architecture principles to support secure payments for 100+ users.
- Optimizing API integration and state management, reducing UI lag and cutting data-heavy screen latency by 25%.
- Collaborating in Agile/Scrum sprints, improving workflow efficiency by 35%.
- Owning end-to-end delivery for 10+ features — from UI development through Google Play Store deployment to post-release monitoring.

Flutter Developer | Mobile App Engineer

Jun 2023 – Jun 2025

First Logic Meta Lab Pvt Ltd | Kerala, India

- Delivered 9+ production-grade cross-platform applications across e-commerce, logistics, and fintech domains, including multi-app ecosystems (customer, admin, merchant, warehouse, driver, and sales-manager apps) — supporting 500+ daily transactions.
- Integrated Razorpay, OTP authentication, Firebase push notifications, and Google Maps API across 6+ production apps, powering secure payments and real-time tracking for 500+ daily transactions.
- Built multi-role applications supporting 4+ user types with real-time tracking using Flutter and Firebase.
- Consumed Node.js REST APIs, handling error management, pagination, and JWT token lifecycle, reducing API-related crashes by 40%.

- Managed the full Google Play Store release lifecycle — testing, CI/CD pipelines, beta rollout, and production deployment — for 6+ live applications.
- Applied clean architecture patterns (MVVM/BLoC), improving maintainability and reducing defects by 30%.
- Automated workflows using Firebase Cloud Functions, reducing manual operations by 60%.

KEY PROJECTS

CivilAcquire — Construction ERP *Flutter | REST API (Node.js backend) | Razorpay | Firebase*

- ERP system for estimation, order management, approvals, and lead automation serving 100+ users.
- Implemented payments, subscription logic, wallet system, OTP authentication, and deployment pipeline.
- Improved operational efficiency by automating approval workflows.

TharaCart — E-Commerce Marketplace Ecosystem *Flutter | REST API (Node.js backend) | Firebase*

- Multi-app marketplace ecosystem with 4+ dedicated apps: Customer Web app, Admin app, and internal operations apps — TharaWarehouse (inventory/warehouse management), Driver app (delivery tracking), and Sales Manager app.
- Built real-time order tracking and logistics coordination across customer-facing and internal operational apps.
- Designed role-based flows connecting customer ordering, warehouse fulfillment, driver delivery, and sales-manager oversight into a single ecosystem.

VivlinoShop — Credit Ledger App *Flutter | Firebase*

- Ledger system with reminders, repayment workflows, and push notifications.

DCost — Multi-Role Commerce Platform *Flutter | Firebase*

- Commerce platform with three dedicated apps — Admin, Merchant, and Customer — covering product listing, order management, and merchant operations.
- Built role-specific dashboards and order workflows across all three apps.

Nexora — UI/UX Design System (Internal) *Flutter*

- Designed and engineered a reusable Flutter UI/UX design system for internal company use, standardizing components, theming, and design patterns across projects.

Construction Admin & DMS System (Internal) *Flutter | REST API (Node.js backend)*

- Internal ERP with EMI tracking, geo-tagged uploads, and real-time dashboards.

KEY ACHIEVEMENTS

- Recognized for architecting complex multi-role app ecosystems — customer, admin, merchant, warehouse, driver, and sales-manager — that streamlined operations across ERP, e-commerce, and logistics domains.
- Cut manual operational workload 60% through Firebase Cloud Functions automation.
- Reduced API-related crashes by 40% and cut data-heavy screen latency by 25% through optimized state management and API handling.
- Took full ownership of app store releases — beta testing, CI/CD pipelines, and production rollout — across every live application.
- Accumulated 3+ years of hands-on Flutter development experience spanning ERP, e-commerce, logistics, and fintech domains.

EDUCATION

Bachelor of Computer Applications

2020 - 2023

Calicut University, Kerala

Higher Secondary — Computer Science

2018 - 2020

GVHSS Cherpulassery, Kerala
